

HARDINGE COMPANIES WORLDWIDE

Hardinge is a leading international provider of advanced metal-cutting solutions. We provide a full spectrum of highly reliable CNC turning, milling, and grinding machines as well as technologically advanced workholding accessories.

The diverse products we offer enable us to support a variety of market applications in industries including aerospace, agricultural, automotive, construction, consumer products, defense, energy, medical, technology, transportation and more.

We've developed a strong global presence with manufacturing operations in North America, Europe, and Asia. Hardinge applies its engineering and applications expertise to provide your company with the right machine tool solution and support every time.

Spindle Tooling for Automatics, Turret Lathes and Rotary Transfer Machines

Serving the Industry since 1890

Manufacturing Workholding Products for over a Century

Hardinge is the world's largest manufacturer of spindle tooling. Products are ready from stock in a vast array of styles, shapes and sizes for single- and multi-spindle automatic screw machines, turret lathes, rotary transfer machines, CNC lathes, mills and grinding machines.

Generations of Hardinge machinists have been producing collets, feed fingers and pads for all makes and models of machines for the past 100+ years. Hardinge continually strives to bring products to meet ever increasing machining requirements.

Hardinge is no stranger to special requirements – non-typical workpiece materials, workholding for specialty and high-production machines, assembly and other process tooling requirements. We specialize in finding solutions to your hard-to-grip parts – extruded stock, non-round parts, eccentric, off-center and stepped parts. Hardinge will work closely with you to solve your individual needs while working within your parameters.

PMPA and the Industry

Hardinge actively supports the Precision Machined Products Association (PMPA) in their role to provide management and technical services to member companies in areas of supervision and production. Today, PMPA serves a growing membership from across North America.

Access to information is imperative. Hardinge shares their 100+ years of experience as a manufacturer, as a machine shop, as an educator and as a technological leader through organizations such as PMPA, industry trade shows, conferences and a very comprehensive website. Hardinge is your unparalleled resource for technology, information, products and performance – your performance.

World-renowned Machine Tool Builder

Hardinge has provided metalworking leadership to the world for over a century. They have developed into a global leader with manufacturing facilities on three continents and a presence in thirty countries. Hardinge continually integrates new and advanced technologies into their products and services to assist you in enhancing your operations. Hardinge manufactures a broad range of machines for high-performance turning, milling and grinding, and of course the industry's premier line of workholding and industrial products in Elmira, New York.

Six spindle cover photo courtesy of Index Corporation.

Customer Saves over \$40,000

Hardinge designed an economical pick-off collet compatible with Euroturn, Gildemeister and Tornos Deco machines. The customer inserts the Hardinge ID collet assembly into the machines "standard" OD pick-off attachment instead of purchasing a costly ID pick-off attachment from the machine builder. Euroturn's "standard" OD pick-off attachment, as shown to the right, will have the flexibility to grip the part internally using the Hardinge ID pick-off collet shown.

Hardinge Workholding Overview

...highest manufacturing standards in the industry

Swiss-Type Collets, Guide Bushings and Bar Loader Collets

Hardinge offers 24-hour delivery of headstock and sub-spindle collets for most Swiss-type lathes! Also available are bar loader collets for FMB, LNS and Robobar bar loaders, along with remnant retraction collets for Lipe bar loaders.

Request Brochure #2283

Spindle Tooling for Lathes, Mills, Grinding Machines & Fixtures

Hardinge has manufactured collets for over 110 years—world renowned for quality and precision. We offer accuracy and durability at competitive prices with off-the-shelf delivery of collets for all brands of machine tools!

- Hardened and Ground
- Extended-Nose
- Special-Accuracy
- Collet Stops
- Emergency
- Special Shapes
- Dead-Length® Systems
- Step Chucks

Request brochure #2348

Sure-Grip® Expanding Collet Systems

Complete more operations with expansion collets than with standard collets and 3-jaw chucks. Instant centering, quick changeover, wide size range with true parallel gripping, high grip force and exact part length control are featured.

- #100 to #600-style
- For 5C, 16C, 20C, 25C, 3J, A2-5, A2-6 and A2-8 spindles
- 3J Expanding Collet Assemblies
- Expanding arbors for lathes, mills, grinding machines and fixtures

Request brochure #2270

Custom Workholding Solutions Provider

Hardinge experts will design and manufacture custom collets and workholding devices for your typical and nontypical applications. Specials are manufactured to rigid specifications including material, proper heat treat and machined accuracy. See chapter five for more information.

Hardinge Workholding Overview

...the machine tool builder with the total package

HCAC™ Collet Adaptation Chucks

Perform precision collet work on all brands of jaw chuck machines using a Hardinge HCAC Collet Adaptation Chuck. Experience increased productivity, increased capability and increased control over 3-jaw chucks.

- Plain Nose
- Stepped Nose
- B65
- Dead-Length® Style "B"
- Style "S" Master
- Spindle-to-Spindle
- Scroll-Style Chucks

Request brochure #2352

HQC® Quick-Change Collet Systems

Drastically reduce collet changeover time to increase profits—change collet size in less than 20 seconds! Features $\pm 1/64$ " gripping range per collet head. Patented slot seal design allows operator to replace worn seals in seconds—unlike other systems that have to be sent out to be revulcanized. Systems for multi-spindle lathes, collet spindle lathes and chuck spindle lathes are available.

Request brochure #2339

Collets and Accessories for Automatic Screw Machines

Look to Hardinge for solids, masters & pads, feed fingers and pads for all brands of automatics and rotary transfer machines. —details in this catalog!

Sure-Grip® 3-Jaw Power Chucks and Jaws for all brands of Chucks

Hardinge power chucks are competitively priced and designed for increased productivity. They are lever-operated, counter- and dynamic-balanced and designed to run at high RPM. Hardinge also supplies jaws for all chuck brands.

- 3-Jaw Chucks
- Quick-Change Chucks
- Adaptable to All Brands of CNC Lathes
- Metric Serrations
- Counter-Centrifugal Design
- Jaws for All Brands of Chucks

Request brochures #2357 (chucks), #2358 (jaws)

Hardinge Workholding Overview

...precision and reliability for increased productivity

5C, 16C, and 3J Rotary Systems and Accessories

Reduce setup and cycle times with leading positioning technology from Hardinge. DIRECT-DRIVE Rotary Systems incorporate a wraparound torque motor with no gear or mechanical elements for ZERO backlash. The result is Super-Precision® positioning and repeatability in a small footprint. The Hardinge spindle nose allows quick change between collets, expanding collets, step chucks, power chucks and face plates.

- Direct-Drive, Super-Precision® Rotary Systems
- High-Precision Rotary Systems
- All-digital, state-of-the-art Servo Control
- Trunnion Products
- Tailstock and Collet Closer Options

Request brochure #2372

CNC Mill Tooling

Available for all machines requiring BT and CAT-V tool holding systems. AT3 shank-taper accuracy exceeds ANSI standards by 35%.

- Solid-Style Toolholders—end mill, shell mill, semi-flush slitting saw, stub arbor, tapping, boring tool, Jacobs taper, Morse taper and blanks
- ER and TG Collet-Style Holders—stub, standard, extended, extra-extended and strong and rugged (S&R) configurations
- Toolholder Collets—ER8, ER11, ER16, ER20, ER25, ER32, TG100 and TG150
- Mill Accessories—5C and 16C collet blocks, collet extension holders, “Cool Stop” seals, retention knobs and mounting fixtures

Request brochure #2350

Toolholders, Toolholder Collets and Bushings

Hardinge mastered the art of precise heat treatment and manufacturing processes to bring you long-lasting products. Provided are collets, bushings and toolholders for Swiss-type lathes, CNC lathes and manual lathes, as well as CNC and manual mills. Look to Hardinge for optimum gripping force and efficient push-back control.

- Single-angle
- Double-angle
- Precision Bushings
- Solid Bushings
- Preset Bushings
- Cincinnati Monoset
- Lathe style
- Lensmaker
- Floating Tap Collets
- Tap Holder

To order Online:

www.hardingetooling.com

Hardinge-trained phone correspondents are waiting for your call. To expedite the ordering process, please be prepared to supply the Hardinge part number or product description, your machine make and model number, and the size and shape of the collet order hole (for example 1/2" hex or 29 mm round).

Hardinge offers quick and easy ordering via the Internet at any hour, any day of the week! Visit hardingetooling.com to place your direct order for collets, chucks and other workholding systems. Pricing and stock status is at your fingertips. When you've selected everything you need, it is safe and easy to "check out" with confidence using the secure website. You will receive instant confirmation that your order has been received by Hardinge, followed by exact delivery information from a Hardinge correspondent.

Hardinge accepts payment by VISA, MasterCard, American Express or Discover card. Purchase order numbers are accepted for established accounts. In the United States, the regular method of shipping is via United Parcel Service (UPS). Overnight and second-day delivery service is available for in-stock items at additional charge.

From bar stock to finished product – 100% in-house

Individual care goes into every collet, feed finger and pad, at each manufacturing process, from handling the initial bar stock to polishing and laser etching. Generations of skilled-machine operators have taken part in the many important processes of producing a hardened and ground collet. Hardinge has been manufacturing workholding and industrial products for all brands of lathes, mills and grinding machines for over a century. Process expertise, precision and accuracy provides a workholding product that is world-renowned.

Spindle Tooling for Automatics

Customary Use of Collets and Feed Fingers With Brown & Sharpe Machines

STYLE "B" PADS

B&S Style	Hardinge® Style	Hardinge Part Number
00M	B1	6601
10M	B10	6643
10AM	B10AM	6649
11M	B3	6611
11AM	B11	6653

#00 and #00G Automatic:

#00 Collet
#00 Finger for $\frac{5}{16}$ " Capacity Tube
#00A Finger for $\frac{3}{8}$ " Capacity Tube

#10 Collet
#10 Finger for $\frac{3}{8}$ " Capacity Tube
#10A Finger for $\frac{1}{2}$ " Capacity Tube

NOTE: With Chuck Nut for Taper-Nose Collets, use #00B Collets.

#00 Automatic with $\frac{3}{4}$ " Capacity:

#11C Collet
#10AA Finger for $\frac{3}{4}$ " Capacity Tube
With Alternate Chuck Sleeves:
#11 Collet
With Alternate Adapters:
#10 or 10A Fingers

#0 and #0G Automatic:

#11 Collet
#11 Finger for $\frac{1}{2}$ " Capacity Tube
#11A Finger for $\frac{5}{8}$ " Capacity Tube
#11B Finger

When using Outside Feeding Attachment:

#11C Collet
#21A Finger for $\frac{3}{4}$ " Capacity Tube

NOTE: With Chuck Nut for Taper-Nose Collets, use #11B Collets.

#2 and #2G Automatic:

#22 Collet
#22 Finger for 1" Capacity Tube
#22B Collet
#22A Finger for $1\frac{1}{8}$ " Capacity Tube

When using Outside Feeding Attachment:

#22A Collet for $1\frac{5}{16}$ " Spindle
#22B Collet for $1\frac{1}{16}$ " Spindle
#22B Finger for $1\frac{3}{8}$ " Capacity Tube
#22C Collet
#22H Finger for $1\frac{1}{4}$ " Capacity Tube
#22D Collet
#22D Finger for $1\frac{1}{2}$ " Capacity Tube

#2 Ultramatic With $1\frac{5}{8}$ " Capacity:

#22D Collet
#22DD Finger for $1\frac{5}{8}$ " Capacity Tube
With Alternate Chuck Sleeves:
#11, #11C, #22, or #22C Collets
With Alternate Adapters:
#10, #11AA, #22, #22H, or #22D Fingers

#3 Ultramatic With 2 $\frac{3}{4}$ " Capacity:

#23 Collet or #23A Collet
#23 Finger for 2" Capacity Tube*
#23M Master Collet and Pads
#23M Master Finger and Pads*

With Alternate Chuck Sleeves:
#22, #22C, or #22D Collets

With Alternate Adapters:
#10, #11AA, #22, #22H, or #22D Fingers

* From sizes 2" to 2 $\frac{3}{4}$ " inclusive, an Outside Feeding Attachment and Stock Loader are used.

#4 Automatic With $1\frac{1}{8}$ " Capacity:

#24 Collet
#24 Finger
#24M Master Collet and Pads
#24M Master Finger and Pads

#6 Automatic and #4 Automatic With 2 $\frac{3}{4}$ " Capacity:

#26 Collet
#26 Finger
#26M Master Collet and Pads
#26M Master Finger and Pads

#0 Wire Feed Screw Machine:

#10 Collet
#10 Finger for $\frac{3}{8}$ " Capacity Tube

#10B Collet
#11A Finger for $\frac{5}{8}$ " Capacity Tube

#1 Wire Feed Screw Machine:

#11 Collet
#11 Finger for $\frac{1}{2}$ " Capacity Tube

#21 Collet
#21 Finger for $\frac{5}{8}$ " Capacity Tube
#21A Finger for $\frac{3}{4}$ " Capacity Tube

#21 Collet
#12 Finger for $\frac{7}{8}$ " Capacity Tube

#2 Wire Feed Screw Machine:

#22 Collet
#22 Finger for 1" Capacity Tube
#22B Collet
#22A Finger for $1\frac{1}{8}$ " Capacity Tube
#22C Collet
#22H Finger for $1\frac{1}{4}$ " Capacity Tube

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

Neoprene chip and coolant seals not included with collets (see Chapter 4).

Feed tubes determine rated capacity.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

1 - Round
2 - Hexagon

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

Neoprene chip and coolant seals not included with collets (see Chapter 4).

Feed tubes determine rated capacity.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

Feed Finger, Conventional Style Master 4-Split	3193-00-30										

5 - Specify three splits or four splits

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

Neoprene chip and coolant seals not included with collets (see Chapter 4).

Feed tubes determine rated capacity.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

1 - Round
2 - Hexagon

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

Neoprene chip and coolant seals not included with collets (see Chapter 4).

Feed tubes determine rated capacity.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

Slots may vary according to tension requirements

3 - Master Collet Pads available in smooth or serrated order holes

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

S-pads available in hardened and ground, semi-hard emergency and soft emergency.

3 - Master Collet Pads available in smooth or serrated order holes

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

S-pads available in hardened and ground, semi-hard emergency and soft emergency.

Call if your newer machine is not listed. Hardinge continuously builds new collets to meet industry requirements.

Style "S" Master Collet & Pad

Style "B" Master Feed Finger & Pad

3 - Master Collet Pads available in smooth or serrated order holes

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

S-pads available in hardened and ground, semi-hard emergency and soft emergency.

1 - Round

2 - Hexagon

3 - Master Collet Pads available in smooth or serrated order holes

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

S-pads available in hardened and ground, semi-hard emergency and soft emergency.

Call if your newer machine is not listed. Hardinge continuously builds new collets to meet industry requirements.

Feed Finger, Style “AF” Master Adjustable Tension	7083	3	AF7	7317¹ 7319²	1.593" (40.46)	4.750" (120.65)	—	1.434" x 24 LH	½" (12.70)	1⅝" (28.58)	½" (12.70) 1⅝₁₆" (23.81)
Bushing, Style “AF”	7363	4	AF7		1.235" (30.99)	1.938" (49.21)	—	—	½" (12.70)	1⅝" (28.58)	½" (12.70) 1⅝₁₆" (23.81)

1 - Round

2 - Hexagon

3 - Master Collet Pads available in smooth or serrated order holes

NOTE: Millimeters in parentheses.

Collets and feed fingers available for larger capacity machines.

Collets available in smooth or serrated order holes.

For feed finger pads, styles "A" and "B" available in hardened steel, nickel cast iron, bronze, or nylon; style "AF" in hardened steel or chrome plated.

S-pads available in hardened and ground, semi-hard emergency and soft emergency.

Options:

Hydraulic Power Unit
Ingersoll-Rand Pneumatic Ratchet
Nylon Retaining Plugs

For all Hydraulic Changing Fixtures Part Number: STA-0009189-01
RW6 Part Number: ST -0009189
Supplied installed in collet head Part Number: 7759

NOTE: See solid collets under specific manufacturer for dimensions.
Collet Head Changing Fixture part number requires "ST" prefix.
Initial order for Collet Head Changing Fixture includes QC Slot/ Seal Inserts and Nylon Retaining Plugs assembled in place.

Pads for Master Collets & Feed Fingers

Master collets, master feed fingers and pads
Hardinge has manufactured collets for over a century. Using those years of expertise, Hardinge designs master collets and master feed fingers that perform better than other products in the marketplace.

Laser etching process in the B-pad cell at Hardinge in Elmira, New York.

Why purchase master collets and feed fingers rather than solids?

While the initial investment will be slightly more, the advantage of achieving more versatility at a lower net cost assures the user of a profitable return. Master collets and feed fingers are capable of holding and feeding bar stock in a variety of sizes and shapes by using interchangeable pads. Thus, the same workholding tool can be used for more than one job to reduce tooling cost, provide greater flexibility in operation, and save on storage space.

Pads for master collets and feed fingers are available from stock in round, hexagon, and square shapes. Extruded and unique shapes can be custom-made through our Special Collet Department. B-pads are available in a variety of materials, including hardened steel, cast iron, bronze, and nylon to meet specific workholding and work-feeding needs.

Master pads made from Nylatron help eliminate marking the workpiece. Made to order.

Pads for Master Collets & Feed Fingers

Style "S" Master Collet Pads

The Style "S" master collets and pads overcome all the problems associated with master collets. When loading bars, the rugged shoulder of the pad locates against the front of the groove in the master collet. There are no set screws or clamps to be damaged or loosened. When a part is machined, the working forces are against the rear shoulder of the pad which is located against the rear shoulder of the groove in the master collet. Again, there are no screws or clamps to wear or break. The clamp which holds the pads captivated in the collet literally floats longitudinally, assuring that there is never any pressure on the clamp. There are no holes in the OD of the master collet, or on the ID of the pads, resulting in maximum bearing on the workpiece and the spindle collet seat. When Style "S" collets are used, there will never be high spots on the spindle collet seat caused by the master collet and pad design. When selecting master collets from this catalog, remember the Style "S" design has been in existence for over 50 years and is the preferred system.

Style "AF" Master Feed Finger Pads

The "AF" master feed finger pads are designed to give you extreme flexibility with a very small investment. Each set of pads has a range of $\frac{1}{32}$ " adjustment down, reducing the inventory of pads required. Each click on the adjusting collar adds or subtracts between 5 to 7 pounds of pressure on the bar stock. This master outshines all others when feeding thin-wall tubing. If the stock you run is very abrasive, these pads can be adjusted to maintain the force required to feed your stock when competitive pads would have to be replaced. This master feed finger may not have the full range of your collet, but within its range it will prove to be a real boost to your productivity and it will reduce your overall operating cost.

Style "B" Master Feed Finger Pads

Style "B" master feed finger pads are uniquely designed and proven by over fifty years of use in the machine tool industry. The straight-forward design allows for full bearing of the pad ID on the workpiece. There are no screws or tabs to wear, or to remove bearing area from the pads ID. The master feed fingers are spring tempered to the proper gripping tension for maximum longevity. Custom master feed fingers can be easily and quickly manufactured at Hardinge to give extremely light grip, or heavier grip for nonstandard applications. The use of Style "B" master feed fingers will assure you of minimum downtime on your production floor.

Pads for Master Collets & Feed Fingers

Hardinge® Style "S" Master Collet Pads

Maximum bearing surface between the spindle and head angle. Because there are no holes or slots in the head angle of the collet, uneven wear of the spindle will not result from continuous use. There are no threaded holes in the collet to be stripped or damaged.

Ease of Use. Since the pads are interchangeable without removing the master collet from the spindle, collets do not have to be removed from the machine when changing the bar stock size. Independent clamps slide freely in and out of the master collet so they can be removed with ease.

Secure Pad Installation. The unique dovetail anchor system securely holds pads in place while feeding bar stock. This design places the bar thrust on the shoulder of the pad. There is no pressure on the clamp assembly because it is ideally positioned between the pad shoulder and the recess of the collet. The pads cannot dislodge under normal use.

Pads for Master Collets & Feed Fingers

Hardinge® Style "AF" Master Feed Finger Pads

The Hardinge style "AF" feed finger is versatile, adjusting quickly and easily to the tension you need. The style "AF" feed finger uses inexpensive pads which are readily available from stock. Each master feed finger includes a threaded locking cap which rotates to adjust in five- to seven-pound increments to increase or decrease tension. For thin-wall tubing and delicate stock, extremely light tension can be achieved. Because the style "AF" master feed finger can be adjusted to hold greater variations of bar stock sizes, you'll need to purchase fewer pads than with most other types of master feed fingers. Pads, which are sold separately and are required with each master, are held securely in place without screws. Guide bushings are sold separately and are recommended to minimize bar whip.

Dependable and Versatile. The guide bushings control bar whip to minimize feed "hang-ups" and allow a better finish on the part being machined. A variety of inexpensive pads can be used to adjust to different bar stock diameters. A full $\frac{1}{32}$ " adjustment can be achieved from the rated size down. This eliminates the need for decimal/millimeter pads and pads in $\frac{1}{64}$ " increments.

Pad Style	Description	Pad Part No.	Round Capacity		Hex Capacity		Guide Bushing	Cap Wrench
			Min.	Max.	Min.	Max.

Pads for Master Collets & Feed Fingers

Style "B" Master Feed Finger Pads

Hardinge Style "B" feed fingers and pads are the most practical feed fingers for high production bar machining. Designed and manufactured to be the most reliable on the market today, they offer many advantages over other styles.

Dependable. There are no screws or pins to hold pads in place. Pads cannot come loose and they offer full bearing on the bar stock.

Versatile. Pads are stocked in round, hexagon, and square shapes, in a variety of materials and sizes.

Affordable. The versatility of a master feed finger can be increased by the purchase of inexpensive pads in a variety of sizes and shapes.

See chapters 1 and 2 for master feed fingers listed alphabetically by machine, or use the Cross Reference at the end of this chapter.

Pad Material

Hardened Steel Pads are for hot-rolled and cold-drawn stock. This style pad is noted for long wear and will give reasonable freedom from scoring minimized by the greater pad hardness. With our Style "B" master feed finger acting as a durable holder, you can select correct pads to meet your exacting requirements.

Nickel Cast Iron Pads are for use on brass, aluminum, polished or plated bars, and special-finish drawn bars to eliminate scoring of stock. Many tests were made for the selection of this material to remove objectionable scoring of stock and to ensure long wear.

Bronze Pads are for ground drill rod, ground bars, and also with the materials listed for nickel cast iron pads, except brass, to eliminate scoring of stock.

Adjustable

Pads for Master Collets & Feed Fingers

Style "CB" Master Collet Pads

"CB" style master collets and pads were used as original equipment on Acme-Gridley machines. The "CB" master collet has a clamping system designed with one locking screw (cup point) per pad. The back shoulder has a back taper which helps lock the pad into place. The "CB" style offers the following benefits:

Ease of use. Pads can be removed from the collet while the collet is in the machine spindle.

Storage convenience. Locking screws stay in the master collet; therefore, there are no clamps to lose.

More bearing surface. Since there are no holes through the pads on large capacity sizes, the pads offer a full bearing surface.

Style	Description	Hardinge Part No.	Round Capacity		Hex Capacity		Square Capacity

See chapters 1 and 2 for master collets and feed fingers listed alphabetically by manufacturer, or use the Cross Reference at the end of this chapter.

Pads for Master Collets & Feed Fingers

Style "CT" Master Collet Pads

"CT" style master collets and pads were used as original equipment on Acme-Gridley machines. The pad is locked into the collet using two cone point set screws locating into detents in the shoulder of the pad. The threaded holes are in the face of the collet. The "CT" style offers the following benefits:

Ease of use. Pads can be removed from the collet while the collet is in the machine spindle.

Storage convenience. Locking screws stay in the master collet; therefore, there are no clamps to lose.

More bearing surface. Since there are no holes through the pads on large capacity sizes, the pads offer a full bearing surface.

Pads for Master Collets & Feed Fingers

Conventional-Style Standard Master Collet Pads

The pad clamping system on a conventional-style master collet is designed with a screw that goes through the collet head angle and against the side of the pad's shoulder. With this system, the operator must remove the collet from the machine spindle to change the pads. The advantages of this style of master and pads are **Availability** and **Affordability**. These collets are available for most older machines. Pads can be purchased in a variety of sizes, shapes and materials. After the initial purchase of the master collet, pads in a variety of sizes, shapes, and materials can be purchased for less than the cost of solid collets.

Pads for Master Collets & Feed Fingers

Style "M" Martin Master Collet Pads

The Martin Master collet has a slot in the face of the collet that goes through to the head angle to allow the pads to be clamped into place. Pads are held in the collet using a square lug which is threaded into the pad and secured by a taper-threaded locking screw. Benefits include **Ease of Use** and **Storage Convenience**. The collets do not have to be removed from the spindle to change the pads. The clamps stay with the pads and cannot be lost.

MB	M10, M12, M15, M16, M17, M23	7751	5/32" Hex
MC	M20, M21, M22, M26, M30, M32, M35, M40, M47, M50	7753	3/16" Hex

Pads for Master Collets & Feed Fingers

Style "A" Master Feed Finger Pads

The Style "A" pads are designed with a shoulder locating the pad on both ends in the master feed finger groove. A key holds the pad in place, eliminating pad rotation. There are no pins or screws to hold pads in place. The design of this style puts the thrust of loading bar stock on the shoulder of the feed finger rather than against the pads.

Custom Quote Request — 1 of 3

To place your order or Request a Quote simply fill out this form and send the requested information below. All of this information is necessary for us to process your order quickly. Checking the box in front of each item will help to ensure everything is complete before sending the information to us. The following two pages will assist you in choosing your collet configuration.

- ☐ Your Name _____
- ☐ Company _____
- ☐ Address _____
- ☐ City, State & Zip _____
- ☐ Phone _____
- ☐ Fax _____
- ☐ Machine Make and Model Number on which workholding will be used:
(Example: 1-1/4" Acme)
- ☐ Collet Required:
(Example: 1-1/4" Acme, etc.)
- ☐ Spindle Nose:
(Example: A2-5, A2-8, etc.)
- ☐ Sample Stock (6" long - extruded stock), casting, first operation part, finished part
- ☐ Legible Prints of the stock, finished part. These must be marked to show the diameters or surfaces to be gripped. Mark the locating surface used for length control. Please mark the surfaces to be machined.
- ☐ AutoCad Files or dxf files of the above, if available.
- ☐ Written Explanation of any special requirements:
For example special concentricity or perpendicularity requirements, concerns with chip flushing, requirements for thru-spindle coolant, customer concerns with part being deformed by gripping, large variation of gripping surface or locating dimensions, etc.

Explanation:

Custom Quote Request — 2 of 3

- Fill in the Type of Collet or Special (example 1-1/4" Acme)
 - Find the illustration of the feature needed in one of the boxes
 - Put a Bold "X" in the box to indicate that feature
 - Write the required dimensions next to their numbers in the chart to the right
- Note: Only fill in the dimensions for the numbers on one illustration*
